

Proj. Request: Upgrade of Sinclair Road

Proj. Description: This project is divided into two phases: First phase is improvements to intersection of Sinclair at Lincoln, which is eligible for Safety and Congestion Bond Issue moneys. What are planned improvements and is there a schedule of activities for completion of this phase? Second phase is the widening of Sinclair Road. Again, what are the planned improvement and is there a tentative schedule of activities for completion of this project?

Proj. Request: Widen Sunbury Road From SR 161 to Morse Rd.

Proj. Description: Much discussion has taken place on this item due to the development along Morse Road and the re alignment of Stelzer Road. This item is not one that we want forgotten. It is our understanding that this expansion will take place in 3 stages and quite a lot depends on when the realignment of Stelzer happens and the I 270 expansion happens we ask that your department continue working with the traffic consultant hired by The Limited to work on continuing traffic studies for this road.

Proj. Request: Widen Westerville Road from I 270 to Morse Road

Proj. Description: O.D.O.T. announced during 4/90 that this roadway would be widened from I 270 to SR 161. The area of Westerville Road from I 270 up to Morse is the most congested section of roadway. Numerous commercial sites are located on both sides of the roadway, there are housing developments, and the NCAA Athletic fields to help contribute to more additional traffic coming and going along this stretch.

Area of the City:

Proj. Request: Wetmore Road between Glenmawr and N. 4th Street
Proj. Description: All can agree the best solution is reconstruction with curbs and storm drainage system. The assessment system is not a fair alternative! This is a deficiency of an existing roadway, which was already paid for by homeowner's during initial development of the area. The problem seems to be a breakdown of roadway, which needs to be built up for positive water flow. This intersection can be very dangerous, especially at sub freezing temperatures.

Proj. Request: Widen Maple Canyon North of SR 161
Proj. Description: The request is to widen it to 3 lanes with the requested third lane being a dedicated left turn lane. The improvements requested are to also include curbs, storm drainage system, sidewalks and street lighting. The volume of traffic has increased substantially over the last few years. This street was just recently paved, but no other improvements were made.

Area of the City:

Proj. Request: Second right turn lane on eastbound Schrock Road
Proj. Description: The reason for the request was to help move traffic that at times backed up past the Barrington Square apartments. With the addition of a second left turn lane on northbound Cleveland Avenue the sequence of the lights was changed to hopefully move traffic at a better pace. Traffic on eastbound Schrock now backs up past the Barrington Square Apartments and now ends up near Oakcreek Drive, even with the light change.

Proj. Request: Policy Change - Repair curbs before repaving streets
Proj. Description: Numerous streets in Northland were repaved in the last few years, yet because the curbs were not repaired they need to be repaved again, (example Forest Hills Boulevard just north of SR 161.) This is a huge waste of taxpayer money, and a frustration of motorists who are driving on terrible roads, which were just recently repaved. Water that runs down under the asphalt through the broken curbs, and after just two winters have ruined many roads.
